

Cologne, Germany, - September 15–19th

IERASG 2023

XXVIII International Evoked Response
Audiometry Study Group
Biennial Symposium

Save the date
15th - 19th September 2023

Symposium Highlights

Registration open

- invited lectures, workshops, panel discussions and presentations
- World-renowned experts, young researcher and students
- Current research with clinical implications
- Workshops by leading researchers with a clinical focus on
 - Advanced EEG Analyses
 - Electrically-Evoked Response Recording (eABR, eCAEP)
 - Vestibular Evoked Myogenic Potentials (VEMP)
- student presentations: opportunity to present your research

submit your abstract!

INVITATION

Scientific committee

Steven Bell (UK), Andy Beynon (NLD), Robert Burkard (USA), Barbara Cone (USA),
Bob Cowan (AUS), Rafael Delgado (USA), David McPherson (USA),
Suzanne Purdy (NZL), Mridula Sharma (AUS), Joaquin T Valderrama-Valenzuela (ESP)
and Martin Walger (DEU)

<http://www.ierasg23.com>

The IERASG is a society organized for the express purpose of providing an open forum for the discussion of physiologic signals generated within the auditory system. The IERASG meets once every two years at the **Biennial Symposium**. The first ERA symposium was held in West-Germany in 1970.

Cologne, Germany, - September 15–19th

IERASG 2023

XXVIII International Evoked Response
Audiometry Study Group
Biennial Symposium

Registration open

Martin Walger (DEU, Symposium chair) ---- Suzanne Purdy (NZL, IERASG chair)

Symposium Highlights

➤ **Hallowell Davis lecture** Yvonne Sininger (USA) Asymmetry in the Auditory System

➤ **Special interviews:** Lessons from the past, implications for the future

Hillel Pratt (ISR) --- Deborah Hayes (USA) and Jerry Northern (USA)

➤ **Guest lectures: Current advances**

Michael Scherg (DEU) - The sources of auditory evoked responses

David Stapells (CAN) - Susan Small Pediatric EP Lecture

Tobias Moser (DEU) - Towards the Optical Cochlear Implant: Optogenetic Stimulation of the Auditory Pathway

Kirstin Uhler (USA) - Impact of auditory access on speech perception during infancy

Joaquin Valderrama (AUS) - Deconvolution – a magic wand for recording transient evoked potentials

➤ **Round Table discussions:** - New frontiers of electrophysiology in clinical practice -
- Current and future developments in neural speech processing -

➤ **Workshops**

Andrew Dimitrijevic (CAN): Advanced EEG analyses

Andy Beynon (NLD) and Martin Walger (DEU): Electrically-Evoked Responses (eABR, eCAEP)

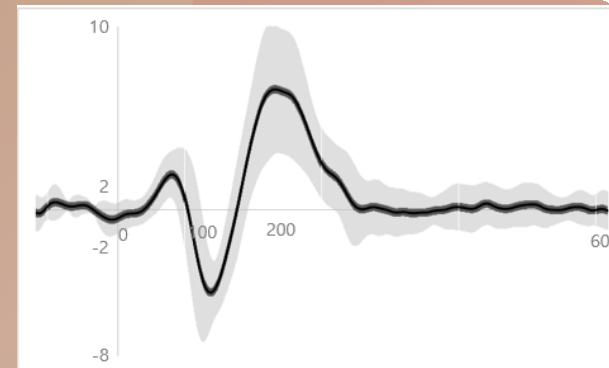

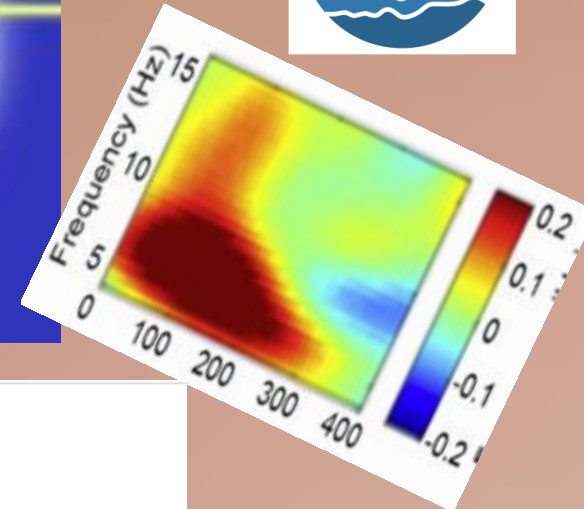

Steven Bell (UK) and Andy Beynon (NED): Vestibular Evoked Myogenic Potentials (VEMP's)

➤ **Student presentations, posters and free lectures**

➤ **Susan Small Student Award**
